

Hello! Thank you for taking the time to complete this Executive Telemetry Audit.

We are always looking for ways to improve our understanding of organizational biophysical systems, and your feedback will help us greatly. Rest assured that any details shared in this questionnaire will be kept confidential and only be used for the purposes of improving our diagnostic framework.

Let us know if you need any accessibility support regarding this questionnaire.

EXECUTIVE TELEMETRY AUDIT

 SECTION 1: THE CORTICAL MAIN ADAPTATION - Neurological Stability

In high-stakes crisis scenarios or sudden macroeconomic shifts, how does the executive core team primarily process incoming high-frequency data volatility?	☐ A) Absolute Field Invariance: The prefrontal cortex maintains flawless wave synchronization; decisions remain cold, objective, and strictly long-range. ☐ B) Intermittent Lag: The team experiences short-term intellectual overload, requiring cognitive coping strategies or temporary operational deceleration. C) The Human Glitch™: Immediate drop into a subcortical survival loop. The amygdala alarm triggers automated evolutionary panic, leading to defensive, reactive short-term micromanagement.
Evaluate the collective communicative environment inside the boardroom during volatile market friction:	☐ A) Symmetrical Co-Regulation: The executive leader broadcasts absolute biological stillness, forcing the surrounding team's mirror neurons to automatically down-regulate stress metrics.

☐ B) Saturated Static: The boardroom feels tense, but individuals mask their internal autonomic acceleration behind professional corporate software templates.

C) High-Frequency Contagion: Dysregulated autonomic nervous systems actively infect the room, causing a cascading bio-behavioral collapse of collective decision intelligence.

SECTION 2: BIO-CHEMICAL MATRIX INTEGRITY - Mitochondrial & Energy Metrics

How is the biological fuel vetting (nutrition, cellular energy management) structured for your key performance operators?

☐ A) Precision Cybernetics: Biomarkers, cellular mitochondrial efficiency, and systemic inflammation metrics are continuously audited to protect energetic capital.

☐ B) Commercial Luxury Standard: The team relies on generic high-end wellness profiles, standard executive health checkups, and standard supplementation.

C) Biological Bankruptcy: High consumption of glucose-spiking stimulants, erratic recovery periods, and a complete absence of cellular infrastructure tracking.

Rate the visible manifestations of chronic exhaustion or hidden structural underclocking (Bore-out/Burnout) within your executive tier:

☐ A) Zero Atrophy: Deep, purposeful execution alignment. The central nervous system is systematically re-bound to its baseline frequency, eliminating empty hyperactivity.

☐ B) Hidden Friction: Team members are structurally bored or quietly checked out, masking their meaning-deficit behind heavy transactional workloads.

C) Terminal Overclock: Pervasive, unaddressed biological decay. Leaders operate on pure evolutionary adrenaline, rapidly accelerating toward a mandatory systemic shutdown.

SECTION 3: SYSTEMIC CONTAINMENT & ORGANISATIONAL

SHIELDING

When the enterprise comes under hostile external pressure (false-flag campaigns, targeted market subversion, reputational warfare), what is the primary defensive response?

- ☐ A) The Biophysical Shield: The core remains completely decoupled from external validation, treating hostile input as dead background noise while legal perimeters enforce compliance.
- ☐ B) Transactional Panic: The organization launches immediate, defensive PR counter-strikes, draining strategic focus and absorbing the emotional weight of the friction.

C) Vulnerability Fracture: Internal factions form immediately; the central infrastructure breaks down under the weight of subverted, uncalibrated fear loops.

EVALUATION METRICS

MAJORITY A // ALPHA ROYAL LEVEL: Your biological and organizational infrastructure is hardened. Your central nervous system is running on the planetary carrier wave baseline. You command the board.

MAJORITY B // OPERATIONAL RISK REGIME: Your system is currently burning through its hidden energetic capital. You are patching deep hardware vulnerabilities with superficial software placebos. An intervention is required.

MAJORITY C // SYSTEMIC CRISIS FRACTURE: The Human Glitch™ is fully active. Your processing units are severely overclocked or atrophied. The enterprise mainframe faces an imminent, forced biological shutdown.
